

ECOPAD

High Security & High Visibility

The **ECOPAD** all weather AED cabinet has been designed to house and protect your emergency life saving equipment, making it available 24 hrs a day, every day. The characteristic round shape and highly visible yellow colour, meeting Disability Discrimination Act requirements, coupled with the "always on" exterior light and unique instructional icons, make it easy to be seen and easy to use. Suitable for larger defibrillators and ideal where a high level of security is needed.

Locked or Unlocked

The choice is yours. The **SHOCKBOX EcoPAD** can be secured with a high quality Marine Grade Stainless Steel key code lock, or provided without a lock if desired.

All Weather IP 65 certified

The **SHOCKBOX EcoPAD** is **IP65** certified against water and dust ingress, heavily insulated and has an intelligent heater providing the ideal environment to keep your life saving equipment safe and ready for use.

Durable

Built to last, the **SHOCKBOX EcoPAD** is constructed from 304 grade Stainless Steel and features an illuminated internal liner, creating a **condensation free** compartment for the AED.

Class 2 Electrical Device

Suitable for telephone kiosks
Low voltage 15 volt electrics
